Organic bin (simple language)

Englisch

The brown bin is for organic waste.

Organic waste is waste from plants. Waste from the garden is also organic waste. It is also called green waste. Cooked leftover food or rotten food is also allowed in the organic bin. First, gas, electricity and heat are made from organic waste. Then soil is made from organic waste, Some people also call it compost.

What goes in the organic waste bin?

For example:

- Leftover fruit and vegetables
- Leftover bread and baked goods
- Cooked food waste
- Garden waste / flowers
- Animal food waste, leftover meat/ Ham, leftover fish, bones
- Rotten/mouldy food waste

Things to remember:

- The organic waste bin is voluntary and there is no extra charge.
- Put your bin out at the edge of the pavement by 6.00 a.m. on collection day.
- The collection dates are shown in the waste calender (paper version), online or in the waste app.
- There are different bin sizes: 60, 120 or 240 l
